

# OUR PROMISE:

**ACTION TODAY FOR A BRIGHTER TOMORROW.**

South Gloucestershire should be a fairer, greener place in 2034, and the council has set out a 10-year vision for the district and a draft plan for the next four years that will help achieve this.

The new draft Council Plan 2024-2028 prioritises four goals, focused on climate and nature, inequality, children, and health and wellbeing, where the council, working with communities and partners, will aim to make a positive difference.
